

## Add Swagger libraries

<https://www.nuget.org/packages/Swashbuckle.AspNetCore/6.5.0>

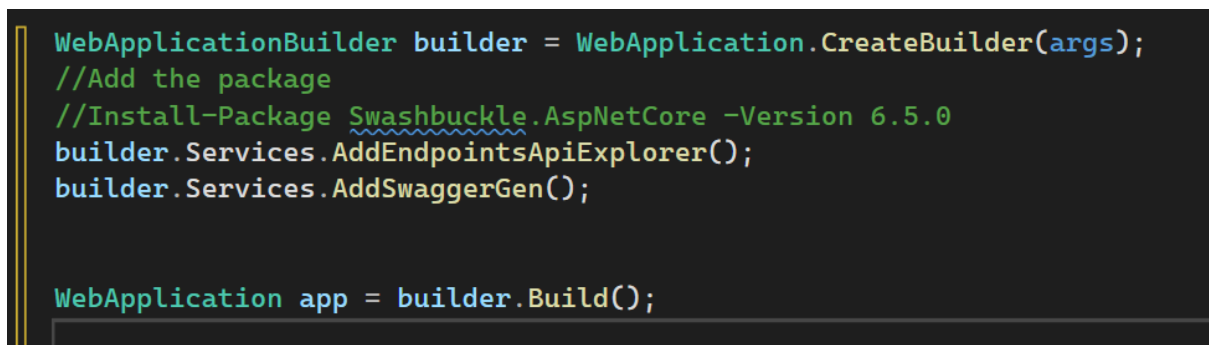

<https://www.nuget.org/packages/Swashbuckle.AspNetCore.SwaggerGen/6.5.0>

Or via Nuget Manager

Add

```
builder.Services.AddEndpointsApiExplorer();  
builder.Services.AddSwaggerGen();  
in program.cs before builder.Build();
```

Add

```
if (app.Environment.IsDevelopment())  
{  
    app.UseSwagger();  
    app.UseSwaggerUI();  
}
```

Before app.Run()

In launchSetting.json , add launchUrl

```
"profiles": {  
  "MultipleVerbMinimalApi": {  
    "commandName": "Project",  
    "dotnetRunMessages": true,  
    "launchBrowser": true,  
    "launchUrl": "swagger",  
    "applicationUrl": "https://localhost:7289/;http://localhost:5289",  
    "environmentVariables": {  
      "ASPNETCORE_ENVIRONMENT": "Development"  
    }  
  },  
  "IIS Express": {  
    "commandName": "Project",  
    "dotnetRunMessages": true,  
    "launchBrowser": true,  
    "launchUrl": "swagger",  
    "applicationUrl": "https://localhost:7289/;http://localhost:5289",  
    "environmentVariables": {  
      "ASPNETCORE_ENVIRONMENT": "Development"  
    }  
  }  
}
```

This will let the application starts at this URL.
