

CV Page (Summary)

Once the CV info are valid and sent we should save info in the data base and display a summary that contains all info in the CV.

An info named "Random number" should be displayed as well. (Number received as route parameter).

* Hints and Constraints :

- 1) You should use dependency Injection.
(Service to save data, ...)
- 2) We should have two different models
(View and Binding) → Tag helpers.
- 3) We should make Server Side Validation.
- 4) Notify layout
- 5) About Photo, display it using url.
- 6) Use `Handler` or `asp-page-handler`

Index Page :
